

Practice Tracing The Number 5 Strokes

The worksheet is designed for practicing the tracing of the number 5. It consists of six rows, each containing eight instances of the number 5. Each instance is placed on a three-line grid (top, middle, bottom lines). The first instance in each row is a dashed outline with arrows and a starting dot indicating the stroke order: a vertical line down, a horizontal line to the right, and a curved line from the top right to the bottom left. The remaining seven instances in each row are solid outlines for independent practice.
